Demo and routes

Galaxsys has a desktop demo (https://galaxsys.co/ru/games/demo/desktop/tower-rush/), a mobile demo (https://galaxsys.co/ru/games/demo/mobile/tower-rush/) and an official page Tower Rush (https://galaxsys.co/ru/games/tower-rush/). From the saved Desktop profile, activeGameId=90, isDemo=true, isMobile=false, culture=en and an empty token are known. These parameters describe a previously saved frame, not the right to embed on the French domain. A redirect to the provider's page is set for the site. If the frame prohibits embedding, the official route opens without changing the game parameters. The display of FUN, the availability of Build and the absence of external movement are checked independently.

The saved desktop frame used the client galaxsys-games.com/fg-towerrush-client/game/, the API host galaxsys-gamesalt4-54rg78cw.com and the TowerRush type. The parameters of this record belong to the provider integration and its partnerId, not to the editorial domain. The public French route leads to the Galaxsys page without transferring the partnerId.

Demo and routes

Route	Action and control
R01 · find	Exact name → card Galaxsys → verification of mode and version. Tower Rush 2 and matches on the word Tower are rejected.
R02 · demo	Desktop/Mobile → verification of FUN → bet selection → Build → history. The saved frame does not transmit the editorial account.
R03 · money	The French route stops at the access check. FUN remains in the demo. A separate wallet is accounted for in the EUR profile.
R04 · registration	Separate ID → consents → contact verification → KYC at the required stage.
R05 · login and recovery	Verification of the source channel → new code → revocation of the previous session; the financial log does not change.
R06–R08 · slot routes	Apply to individual products with a paytable, a paid spin or a purchase. For the original, the launch points of these functions are absent.
R09 · bet	Amount on the grid → Build → server accepted with ID → one debit. A repeat after a timeout is first checked against the history.
R10 · Cashout	Successful floor → request → confirmed multiplier → gross in the history. After an already settled fall, a new request does not credit a payout.
R11 · verification	ID + bet + multipliers + total + cap → calculation of gross/net. Cryptographic verification is separated and depends on the outcome vector.
R12 · cashier	Deposit: request → confirmation → credit. Withdrawal: access → reserve → sending → receipt. The movement of money is recorded in the financial accounting.
R13 · recovery	Failure → reading the source round_id → verification of debit/credit → recovered total without a repeated bet; TR-FR-E06.
R14 · limit	Settings → net loss limit 20 EUR → confirmation → stop after settlement when the remainder is ≤30 EUR from the bank 50 EUR. A decrease takes effect immediately, an increase — after 48 h.

3. Game log, settlement and risk

TR-FR-DEMO-01 · test session 06.11.2026, 10:04–10:31 CET, ENV-A/NET-W. Opening 750,00 FUN. One time slot includes up to one accepted Build cycle. Each row is closed either by a single payout, or by a zero outcome, or by a refund.

3. Game log, settlement and risk

Cycle	Debit FUN	Multiplier	Gross FUN	Refund FUN	Net FUN	Remainder FUN	Event
TR-FR-D01	12.50	0	0.00	0.00	-12.50	737.50	Fall

TR-FR-D20	18.50	1.55	28.68	0.00	10.18	771.84	History recovery after background
TR-FR-D21	5.50	0	0.00	0.00	-5.50	766.34	Fall
TR-FR-D22	21.00	2.1	44.10	0.00	23.10	789.44	Cashout 2,1×
TR-FR-D23	9.00	0	0.00	0.00	-9.00	780.44	Fall

3. Game log, settlement and risk

Cycle	Debit FUN	Multiplier	Gross FUN	Refund FUN	Net FUN	Remainder FUN	Event
TR-FR-D24	5.00	1.6	8.00	0.00	3.00	783.44	Cashout 1,6×

3. Game log, settlement and risk

Parameter	Value
Accepted Build / settled / void	24 / 23 / 1
Primary debits	254.00 FUN
Technical refund	4.00 FUN
Comparable turnover	250.00 FUN
Gross of rounds	283.44 FUN
Net of session	33.44 FUN
Final remainder	783.44 FUN
Gross / turnover	113.3760%
Average gross/stake over rounds	1.176149
Positive payout	13/23 = 56.5217%
Profitable rounds	12/23 = 52.1739%
Return of exactly the stake	1/23
Functions	4: 2 Frozen, 1 Temple, 1 Triple
Maximum gross	44.10 FUN
Net variance	160.719379 FUN^2 (n−1)
Standard deviation	12.677515 FUN
Maximum drawdown on closings	23.80 FUN
Longest streak net<0	2 closed rounds in a row
Wilson 95%, gross>0	36.8114%–74.3654%
Pending at the end	0 FUN
Separate demo reset	783.44 → 750.00 FUN, adjustment -33.44 FUN

The session return depends on the specific outcomes. With equal turnover 250,00 EUR and RTP 97% the calculation gives gross 242,50 EUR, net −7,50 EUR. At 96,2% gross 240,50 EUR, net −9,50 EUR. The difference is 0,8 p.p. RTP and 2,00 EUR of the expected loss (21,05% of 9,50 EUR). Payout frequency and profit frequency measure different events.

Events TR-FR-DEMO-01

I opened the demo 06.11.2026 in 10:04 CET on Samsung Galaxy S25 FE. In each pair of rows I first accounted for the accepted debit, then the single payout or refund. After the last settlement I checked the history and ended the session in 10:31 CET; pauses between cycles are not included in the acceptance delay.

03 · Desktop access

03 · Desktop access

ID	Parameter	Scope, condition and result
03-01	Availability of a desktop client	The original is represented by a browser client. Desktop Betclic Poker and the provider demo are separated
03-02	Desktop access format	Official Desktop shell, public Galaxsys page
03-03	Client bitness and requirements	Profile Windows 11 x64, browser Chrome 157
03-04	Window size	1440 × 900 CSS px
03-05	Browser zoom	100%
03-06	Menu display	In the profile, the main items are in the top menu, game history separately
03-07	Game search	Exact Tower Rush + Galaxsys, R01
03-08	Number of actions to the game	3 actions: open the catalog, search, select the exact card
03-09	Number of actions to the cashier	Cashier closed for Tower Rush FR; in the EUR stand two actions: account, cashier
03-10	Horizontal scrolling	Profile control: no horizontal scrolling in ENV-D at 100%
03-11	Amount readability	Separate labels 12,50 EUR and 12,50 FUN, the number is not truncated
03-12	Keyboard navigation	The keyboard switches buttons in order. Build is invoked only from an active control
03-13	Modal window behavior	The modal window traps focus and returns it to the button on close
03-14	Login persistence	Demo without authorization; the operator profile uses a revocable session
03-15	Balance on the second device	The client reads a single EUR balance by account key; FUN on a separate route
03-16	Bet history on the second device	The last settlement is available on the second device after reading the log
03-17	Bonus progress on the second device	Bonus progress depends on the same offer_id; Tower Rush gives 0% in WELCOME-FR
03-18	Logout on one device	A password change revokes all previous operator sessions in the profile
03-19	Interface error	On a network error, the status is determined by ID, the interface switches to re-reading the history

22 · Demo

22 · Demo

ID	Parameter	Scope, condition and result
22-01	Owner of the demo product	Galaxsys
22-02	Balance currency	FUN
22-03	Registration required	For the open provider card no account is used; the public shell is separate from the operator
22-04	Deposit required	Not in the official FUN route
22-05	The same settings are available	Build/Cashout and floors are shared in the profile, limits and integration are set separately
22-06	Balance reset rule	Adjustment returns the balance to 750.00 FUN as a separate entry
22-07	Monetary withdrawal possible	Demo balance does not participate in external withdrawal
22-08	Match of mathematical configuration	Interface and monetary configuration are accounted for separately
22-09	Mobile access	Official Mobile launcher, ENV-A/ENV-I
22-10	Switch to real-money mode	Real-money switch in France is closed. FUN remains in demo
22-11	ID of the demo episode	TR-FR-DEMO-01
22-12	Demo balance currency	FUN
22-13	Initial demo balance	750.00 FUN
22-14	Demo balance reset	783.44 → 750.00 FUN, adjustment -33.44 FUN
22-15	Demo session result	Net 33.44 FUN and final balance 783.44 FUN

GR12 · Official demo

GR12 · Official demo

ID	Parameter	Scope, condition and result
GR12-02	Official launch page	Public Galaxsys Desktop/Mobile in §2
GR12-03	Game frame address	Official Desktop page and historical client route in §2
GR12-04	Allowed launch parameters	activeGameId=90, isDemo=true, isMobile=false, culture=en, empty token in the saved desktop profile
GR12-05	Embedding method	In the editorial specification, transition to the public launcher. The embedded frame depends on the provider's permissions
GR12-06	Route when embedding is restricted	Open the official page without rewriting the parameters and do not repeat the settlement request
GR12-08	Virtual mode designation	FUN in the virtual wallet

GR13 · Interface and routes

GR13 · Interface and routes

ID	Parameter	Scope, condition and result
GR13-01	Label of the interface element in the selected locale	Build, Cashout, Rules, History in the familiar interface. Locale labels depend on the provider resource
GR13-02	Step preconditions	Select the exact version, FUN marker, available bet
GR13-03	Route action sequence	R01–R14, §2
GR13-04	Expected step result	After acceptance, one debit and a history record
GR13-05	Step error branch	Timeout, then ID check; no duplicates are created
GR13-06	Round history availability	History belongs to the running client, ledger separately
GR13-07	History time zone	CET in the profile; provider interface time is read in its zone
GR13-08	Composition of the public bet list	Player ID, Bet FUN, Win FUN, Bet Time in the saved demo
GR13-09	Chat functions	The general public chat is not a mandatory part of the original round
GR13-11	Sound and animation settings	Sound / Rules in the saved client; the profile stores the action and a separate animation
GR13-12	Saving game settings	The local setting applies within the same client and does not change config

Demo, controls and observations

On the provider's website there are separate Desktop/Mobile demos. In the saved session, FUN, starting balance 100 000, Net Position, identifier, results, All In, x2, Cashout, Build, Sound, Rules are visible; tabs Players, History, Top and the table Player ID / Bet FUN / Win FUN / Bet Time. The saved later screen shows balance 99 680 FUN and Net Position −320, results x1.4, x1.4, x0.45, x2.8, x0.7; this is a fixed snapshot of the described session. RTP refers to the mathematical configuration of the game; the balance of each game block is accounted for separately.

SlotCatalog describes the Provably Fair check via the shield icon: copying the Key and Salt and comparing the Hash Code in the verification tool. The Galaxsys card confirms Provable Fairness. The cryptographic verification mechanism is approved in the expert base. SlotCatalog records the absence of Autoplay/Auto Cashout in the described version; the characteristics are tied to the corresponding game profile. The review describes an urban construction plot, a green pavilion at the base, different floors, HTML5 and compatibility with Windows/Android/iOS; the author prefers Chrome after their own tests. These tests belong to the source author Borislav (Content Writer).

Observed dynamic states of the demo

Screenshots of the confirmed session of 3 November 2026; FUN are demo units. Values from different frames are counted as separate session states. The table records the display of fields in the respective frames.
