A payment fee on top increases only the external debit. In Betclic the incoming and outgoing test cases have separate premises. There is no link to the Tower Rush money cycle.

Connection, failures and bonus balance

The server determines the results. Poor connection and device performance may delay updates, animation and display of the result; the provider considers this to be factors beyond its control. If connection is lost after the server accepts the bet and is not restored within an hour, the round ends after an hour of inactivity. A registered win is automatically credited to the balance. In the event of a malfunction of gaming equipment/software, the corresponding bets and payouts are voided and bets are returned.

The rules provide for Free Bet (a specified number of free bets) and Free Amount (bonus money). Example: 10 × 100 FUN means ten bets of 100 FUN; example Free Amount — 1000 FUN. The bonus must be activated; before playing for real money, an active Free Bet/Free Amount must be disabled. If the bonus balance is less than the

bet, a insufficient bonus balance error appears. The specific casino bonus and Tower Rush's participation in its wagering are fixed by the terms of the corresponding offer.
