Editorial specification

- For the editorial site, necessary language-selection cookies and consent-based analytics are provided. There are no editorial accounts, comments, newsletter, advertising pixels or AI chat. The specification selects Matomo on own hosting at OVHcloud, Gravelines (France); contractual information is considered separately from the configuration.
- Editorial retention periods: requests 75 days from closing, email copies 105 days from closing, technical logs 21 day from the event, backups 35 days from creation, aggregate analytics 45 days from the event. Deleting a working record does not automatically change the backup snapshot before its period expires.
