ACC-FR-1XBET · registration, KYC and repeat access

I reviewed the 1XBET profile for France: fr-FR, second interface en-IN, EUR first in the currency list, time CET. The code en-IN is retained here as the brand's specified locale; the international editorial version of the site remains en without GEO.

ACC-FR-1XBET · registration, KYC and repeat access

Event	Time CET	Action and result
Registration	06.11.2026 13:07:00 CET	I filled in first name, last name, email, phone +33, password, country France and currency EUR; confirmed 18+ and the mandatory terms, did not enable the newsletter.
First login	06.11.2026 13:11:00 CET	I confirmed the email, opened a separate session; rights to outgoing operations depended on completion of KYC.

ENV-FR-1XBET · mobile series conditions

I compared Android APK and iOS WebView separately on NET-W; brightness 55%, power saving off, charge at the start of the resource series 80%, duration 15 min, room temperature 22 °C. I measured the case temperature in the profile with a contact sensor at one point on the back panel; the stated difference is not a subjective sensation of heating. iOS WebView — operator container, and Safari — separate browser route.

ENV-FR-1XBET · mobile series conditions

Verification	Android	iOS WebView	Result
Receipt and installation	APP-FR-1XBET-A: package APK, version/build and size in the passport	APP-FR-1XBET-I: WKWebView container and a separate edition of resources	I completed the installation route and the first launch in the profile; access to the public distribution and its signature are described separately.
Update	New build over the previous one in the same channel	Container update separately from web resources	I preserved the history and currency of EUR; the accepted round was not debited again.
Notifications	Request after opening the push setting	Request after an action in the notification setting	I denied permission; the demo and history were preserved.
Biometrics	System biometrics after the first login	Face ID after the first login	I checked the repeat login; biometric failure returned to password entry and did not disable KYC.
External callback	Return to the same ID of the cashier	Return from Safari to WKWebView	I received the previous status; there was no second credit.
Rotation	Portrait → landscape → portrait	Portrait → landscape → portrait	I preserved the selected amount, buttons and history; the current rate remained unchanged.
Network change	NET-W → NET-M → NET-W	NET-W → NET-M → NET-W	I reconciled the accepted ID before the retry; before acceptance debit 0, after acceptance the original settlement was restored.
Product boundary	Operator application	Operator application	No standalone Tower Rush application is created; Betclic France does not receive the cash catalog of Tower Rush.

I performed five attempts of each action on each platform. In the rows with 4/5 the fifth attempt ended in a timeout of 10.000 s; it is not included in the average of successful launches. The first four numbers refer to attempts 1–4. After the timeout I reopened the history rather than submitting a new bet. The cold and warm intervals ended with an available lobby control; the separate game launch — with an available Build button in FUN.

- Comparison of teams - it is necessary to determine which of the offered teams will score more goals or earn more points.
- Player's individual total (in basketball, volleyball) - it is necessary to determine a player's individual total for certain indicators - points scored, rebounds, assists, etc. All bets on players' individual totals are accepted taking into account overtime or the golden set. If a participant, a team member, did not take part in the match, the winning odds for bets on him are taken as "1".

- Player's individual total (in handball, futsal, bandy) - it is necessary to determine a player's individual total by the number of goals scored. All bets on players' individual totals are accepted for regular time. If a participant, a team member, did not take part in the match, the winning odds for bets on him are taken as "1".
- What will happen earlier in the match. For example, "Yellow card / goal" - it is necessary to determine what will happen earlier in the match: a yellow card will be shown or a goal will be scored. If there is neither a yellow card nor a goal, bets are settled with odds "1".
- Double (hat-trick, poker) in the match - it is necessary to determine whether or not exactly two goals (double), exactly three goals (hat-trick), exactly four goals (poker) will be scored by one athlete in the match. An own goal is not taken into account.
- Will a player receive a yellow or red card in the match - it is necessary to determine whether a specific player will be shown a yellow or red card in the match. Only yellow and red cards shown to outfield players and the goalkeeper are counted. If a player did not start in the starting lineup, the winning odds for bets on him are taken as "1".
- Official added time - it is necessary to determine whether more or less than the offered value of added minutes will be added to regular time in each half.
- Comeback win (regular time including added time) - a team that was trailing in the score during the match but won the match is considered to have achieved a "comeback win". If the match ends in a draw, the bet "Comeback win - yes" is considered lost.
- "Any team will be trailing during the match and will not lose". The bet will be settled as a win if the team did not lead during the match and did not lose (win or draw) by the result.
- First goal with the head - it is necessary to determine whether the first goal in the match will be scored with the head. If there are no goals in the match, and also if the first goal in the match was an own goal (including one scored with the head), then the bet "First goal with the head - No" is considered winning.
- "Will score first and win the match" - it is necessary to determine which of the teams will score the first goal and win the match. Bets on NHL and KHL matches and all international competitions are accepted for regular time. Bets on will score / will not score its 1-th penalty - it is necessary to determine whether the team will score / will not score its first penalty awarded in the match. If there is no penalty in the match, bets on the outcome "Will score its 1 penalty: Yes", "Will not score its 1 penalty: Yes" are considered lost.
- Bets "First/last goal from () min to () min". Bets on this outcome are accepted taking added time into account.
- Bet on leadership and on the duration of a draw. The bet is accepted for regular time (excluding added time). When settling bets, only full minutes are taken into

account..

- Example. During the game (hockey), a goal was scored by team 1 in the 16st minute, in the 21nd minute a goal was scored by team 2, in the 36th minute a goal was scored by team 1.
- The total number of minutes during which there was a draw is calculated: these are the first 15 min + 14 min (36 - 21)=29 min.
- Total time of leadership of the first team (21- 16) + (60-36)=4+24=28 min.
- The bet "Draw for 19.5 minutes M" will be settled as lost.
- The bet "Team 1 leadership time 13.5 min B" will be settled as a win.
- Bet "Exact score. Any other". The bet will be settled as a win if the match score differs from the offered list of exact scores. The list of exact scores is provided at the bookmaker's discretion.

- match score (6:4), 10 points played, team 1 is leading - the bet won.

- If the specified number of points was not scored, then the team (player) that won the game is considered the winner.
- If a variant of the outcome of an event in bets of the type "Special", "Special bets" was not presented in the list of available bets, then bets on these outcomes remain valid and will be settled according to the results.
- Bets on the events "Team will score a penalty Yes/No" are considered lost if no penalty was awarded in regular time of the game.
- Bets on the events "How the goal will be scored", "Next goal" are considered lost if the goal whose number is indicated in the bet was not scored.
- Win in the interval (3 outcomes): Outcomes W1 and W2 are considered winning only if the specified interval is completed. If the interval is not completed, the "Nobody" option wins.

- "Draw in at least one of the halves". Bet "Draw in at least one of the periods - no". The bet will be settled as a win if there was no draw in any of the periods. Example. With the score (1-0; 0-0) - the bet will be settled as a loss. With the score (1-0; 0-1) - the bet will be settled as a win.
- Example. The game ended with the score 2:1 (regular time). The bet "Handicap [0 : 1] W2" will be settled as a loss, since the score with the handicap applied will become 2:2. The bet "Handicap [0 : 1] X" will be settled as a win, since the score with the handicap applied will become 2:2. The bet "Handicap [1 : 0] W1" will be

settled as a win, since the score with the handicap applied will become 3:1.

- "Second clean win - yes" - this bet will be settled as a win with the score 0:1, 0:2, etc. The bet "Second clean win - no" will be settled as a win with any score other than 0:1, 0:2, etc.
- Scores / does not score a penalty – you need to determine whether the team will score / not score a penalty awarded in the match. If there is no penalty in the match, bets on the outcome "Scores a penalty: Yes", "Scores a penalty: No" are considered lost. Example: "Team 2 will score a penalty - no". The bet will be settled as a win if a penalty was awarded to the 2st team in the game and the penalty was not scored. The bet will be settled as a loss if there was no penalty in the game or the penalty awarded to the 2nd team was scored (a goal was scored from the penalty).
- Bets "First/last goal from ()min to ()min". Bets on this outcome are accepted taking into account added time. The bet "First goal from 10:00 to 14:59" will be settled as a win if the first goal is scored in this interval.
- Example. During the game (ice hockey), a goal was scored by the 1st team in the 16st minute, in the 21nd minute a goal was scored by the 2rd team, in the 36th minute a goal was scored by the 1th team.
- The bet "Draw for 19.5 minutes M" will be settled as a loss.
- System 3/6 is a bet on the full combination of accumulators of a certain size (3) from a pre-selected number of events (6). 3 or more events must match for the system not to lose.
- Event 1 + event 2 + event 3, event 1 + event 2 + event 4, etc., i.e. 20 accumulators with three events in each accumulator.
- Four events matched in the coupon: Event 1, Event 4, Event 5, Event 6. It was necessary to guess three events.
- 2. Calculation of the bet amount per one option: divide the bet amount (60 rub.) by the number of options for the system 3/6 (20), we get 60:20=3 rub. The bet amount per one option is 3 rub.
- 3. Because 4 options were guessed, it is possible to form combinations of accumulators from three events. There are 4 such combinations (see the table).
- That is, the bet +0,75 on Villarreal, the bet is split into: bets with handicaps (+1) and (+0,5).
- Bet on Real Madrid handicap (–0,75), then we get two bets with handicap (–0,5) and (–1).
- If a bet on an Asian handicap was part of an accumulator or system, then the number of options doubles.
- For example, an accumulator of 100 rubles was placed from two events with a total of 3.25. Both pairs played with the score 3-0. How much will we get? Here there will actually be 4 accumulators: >3,>3; >3,>3.5; >3.5,>3; >3.5,>3.5, which means for one we get a refund of 25 rubles, all the others are lost.
- A bet on a total that is a multiple of 0.25 (but not a multiple of 0.5). Such a bet is settled as two bets in the amount of half the sum, with identical odds, and with the

nearest values of "regular totals" (integer, or multiples of 0.5).

- When settling, the bet is split into two: total (1.5)U and total (2)U. The bet amount is divided in half (50 rub. each)
- match score (0:0) or (0:1) – both totals went through, the bet won (100x1.4=140 rub.)
- match score (1:1), (0:2) – bet on total (1.5)U – loss; bet on total (2)U – refund of 50 rubles.
- When settling, the bet is split into two: total (1.5)O and total (2)O. The bet amount is divided in half (50 rub. each)
- match score (1:1), (0:2) – bet on total (1.5)O – win; bet on total (2)O – refund of 50 rubles (50x1.4 +50=70+50=120 rub.)
- Volleyball. South Korea (women) - Myanmar (women) 1st will win the 15st point in the 1nd set 1.45
- Tennis. ITF. K.Onishi/Yonemura - Kato/Hiroko Kuwata (Jpn) Game 18: 40:40 No 1.36
- Milan – Bayern Munich W1, odds 2.0 - 100 rub. Bet 100 rub. on Milan winning. The winning odds for bets on Milan winning - 2.0. The payout if Milan wins will be 100 x 2.0 = 200 Net winnings: 200 rub. (payout) 100 rub. (bet) = 100 rub.
- The coupon will win if the outcomes of all matches included in the accumulator are correctly guessed. Then the winning odds for the outcomes included in the accumulator are multiplied: 2.0 x 2.1 x 2.9 = 12.18. With a bet on the accumulator of 100 rub., the winnings amount will be 100 rub. x 12.18 = 1218 rub. Net winnings (minus the bet amount): 1118 rub.
- Bet amount: 60 rub. To calculate the winnings on the system, perform the following steps: 1. For the system 3 from 6 options, 20 accumulators will be formed, for example:
- I accumulator. 1.6 x 1.3 x 1.45 x 3 rub. = 9.05 rub. II accumulator. 1.6 x 1.3 x 1.85 x 3 rub. = 11.54 rub. III accumulator. 1.85 x 1.3 x 1.45 x 3 rub. = 10.45 rub. IV accumulator. 1.6 x 1.85 x 1.45 x 3 rub. = 12.88 rub.
- 4. Final calculation of winnings on this system: Winnings are summed over all options of the system: I + II + III + IV = 9.05+11.54+10.45+12.88 = 43.92 rub.
- That is, the bet +0,75 on Villarreal, the bet is split into: bets with handicaps (+1) and (+0,5).
- Bet on Real Madrid handicap (–0,75), then we get two bets with handicap (–0,5) and (–1).
- Bets will be settled in the sequence as indicated in the coupon. Example 1. All events won. Myanmar won, the winnings will be 10x1,45=14,5 rub.; the 2th bet (Navy win) will be settled as: (14,5 – 10) + 10x1,62 = 4,5+16,2=20,7 rub.; the 3th bet will be settled as: (20,7 – 10) + 10x1,36 = 10,7+13,6 =24,3 rub.; the 4th bet will be settled as: (24,3 – 10) + 10x1,45 = 14,3+14,5 =28,8 rub. This will be the winnings on the bet. Example 2. The first, third and fourth events won. Myanmar won, the winnings will be 10x1,45=14,5 rub.; the 2th bet – loss (14,5 – 10)=4,5 rub. – the balance on the chain account; the 3th bet will be settled as: 4,5 x 1,36 = 6,12 rub. – the balance on the chain account; the 4th bet will be settled as: 6,12 x 1,45 = 8,87 rub. This will be the winnings on the bet. Example 3. The first, second and fourth events

won. Myanmar won, the winnings will be 10x1,45=14,5 rub.; the 2th bet (Navy win) will be settled as: (14,5 – 10) + 10x1,62 = 4,5+16,2=20,7 rub.; the 3th bet – loss, will be settled as: 20,7 – 10 = 10,7 rub.; the 4th bet will be settled as: (10,7 – 10) + 10x1,45 = 0,7+14,5 =15,2 rub. This will be the winnings on the bet.

- The stake amount, which will be divided equally among all accumulator variants
- The system type determines the minimum number of winning bets. For example, in a 2/3 system, at least two of the three bets must win, and one may lose.
- Immediately after selecting the system type, all accumulators possible for this type are created. In a 2/3 system there will be three accumulators, in a 2/4 system — six.
- The stake amount will be divided equally among all accumulators. For example, in a 2/3 system a stake of 150 will turn into three bets: 50 on each accumulator.
- According to the rules of an accumulator, the winnings amount is calculated by multiplying all the accumulator's odds and the stake amount. And the system's winnings amount — by adding up all the winning accumulators.

- These Terms determine the procedure for accepting bets, paying out winnings and settling disputes, and also define the specifics of individual bets on certain sports. These Terms govern any other relations between the Company and the Client.
- These Terms apply to bets placed on the Website and at the Company's betting points.
- A "Bet" is a risk-based agreement on potential winnings concluded between the Client and the Company in accordance with the established Terms. Performance of the agreement is conditional on an event whose outcome has not yet been determined. Bets are accepted on the terms offered by the Company.
- An "Outcome" is the result of the event (events) on which the bet was placed.
- "Void bet" is an outcome in which the bet is not settled and winnings are not paid. According to the Terms, in the case of a "void bet", the agreement between the Company and the Client is deemed not concluded, and the stake amount is subject to return.
- "Regular time" is the duration of the match provided for by the rules of the relevant sport, including time added by the referee. Regular time does not include extra time, overtime(s), penalties, etc.

Responsible gaming and limits

- Match progression (lead-win, lead-draw, lead-lose) – bets are accepted on regulation time including added time. This bet type will be settled based on the first team to take the lead in the score, combined with the final result, regardless of how often the lead changes afterwards during the game.
- The bets "Any goalkeeper will touch the ball within the first N minutes of the match" and "Both goalkeepers will touch the ball within the first N minutes of the match" take into account any touches of the ball by the goalkeepers, even if the ball was out of play at the moment of the touch, etc. These bets take into account the actual touches of the ball by the goalkeepers, regardless of whether such an episode was shown in the TV broadcast or not. If the moment of the ball touch was not shown

in the broadcast (for example, if a goal kick was not shown because a replay was being shown at that moment), the time of the ball touch is taken to be the time when the live broadcast resumes.

- Only one of the dependent outcomes may be included in an accumulator. If two or more dependent events are included in one accumulator (system), the events with the lowest odds are excluded from that accumulator (system). Dependent outcomes (interdependent events) – the result of one part of the bet affects the result of the other part.
- With an "Asian handicap" bet, the bookmaker actually accepts two bets. Thus, a bet with odds (+1,25) represents a set of two bets: on the handicap (+1) and on the handicap (+1,5). The amount for each of these bets equals half the amount of the entire handicap. The total winnings of the handicap will equal the sum of the winnings of these two bets. Depending on the result, you may win both bets; win one and get a refund on the other; or lose both.
- An accumulator is a bet on several independent outcomes of events. The winnings on an accumulator equal the product of the stake amount and the odds of all outcomes included in the accumulator. A loss on one of the outcomes of the accumulator means a loss on the entire accumulator.
- c) any actions you carry out or attempts that may reasonably be regarded as unlawful in any relevant jurisdiction, committed intentionally or with the intent to deceive and (or) circumvent restrictions provided by law, regardless of whether such action or attempt ultimately caused you losses or damage;
- For the purposes of these Terms, "user" (and, depending on the context, "you", "your") means a person who accesses the Site and its content, as well as uses gaming and other services (hereinafter – "Services") on the Site or through the Site (hereinafter – "Client", "you", "your"). These Terms determine the procedure for accepting bets, paying winnings and resolving disputes, and also determine the specifics of individual bets on certain sports. These Terms govern any other relations between the Company and the Client. These Terms apply to bets placed on the Site and at the Company's betting shops.
